## DETAILED ACTION

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method of managing parts using the step of providing storefront database, classified in class 705, subclass 28.
- II. Claim 11, drawn to a method of managing parts using the step of terminating transaction, classified in class 705, subclass 75.
- III. Claims 12, 13, drawn to a method of managing parts using the step of generating a secured area report , classified in class 705, subclass 24.
- IV. Claims 14-23, drawn to a system a method of managing parts, classified in class 700, subclass 90+.
- V. Claim 24, drawn to a system of managing parts using a terminating device, classified in class 709, subclass 227.
- VI. Claims 25,26, drawn to a system of managing parts using a report processor, classified in class 715, subclass 503.
- VII. Claim 27-33, drawn to a memory medium with updating feature, classified in class 369, subclass 13.16.
- VIII. Claim 34, drawn to a memory medium with terminating feature, classified in class 369, subclass 13.22.
- IX. Claim 35, drawn to a memory medium with inventory capacity, classified in class 369, subclass 13.54.

Because these inventions are distinct and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

In the event that applicant elects Group I above he is further required to elect between species as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention:

species of claim 4 to new part invoice step;

species of claim 6 to obtaining customer information;

species of claim 7 to core return information

species of claim 8 to in transit shipment information;

species of claims 9,10 to parts transaction data.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3,5 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication should be directed to Primary Examiner Joseph A. Fischetti at telephone number (703) 305-0731.
